## Sonifex 3G HD video Redboxes showing at Cabsat

Sonifex are showing a new range of Redbox Video Embedders and De-embedders at Cabsat. Eamonn Heffernan, Sales Manager, said: "Our popular Redbox range has expanded significantly of late and we are pleased to show the latest addition of 3G video embedders and de-embedders. Unlike most embedders and de-embedders that use DC inputs in small format cases, we have used 1U racks with AC inputs."

There are 4 units in the suite: the RB-VHEMA8 which is an 8-channel analogue embedder; the RB-VHDMA8 which is an 8-channel analogue de-embedder; the RB-VHCMA4 which is a 4-channel analogue de-embedder and a 4-channel analogue embedder and the RB-VHCMD16 which is a 16-channel de-embedder and 16 channel embedder.
