SONIFEX ENTERS VIDEO PROCESSING REALM

Sonifex's Redbox RB-VHDA8 is a one input, eight output high performance 3G/HD/SD-SDI distribution amplifier for re-clocking and distributing a 3G, HD-SDI, or SD-SDI source to eight outputs. The unit provides automatic input detection, re-clocking and cable equalisation of the input signal to 200/400 metres (HD/SD) of coax cable. The full range of SD, HD, and 3G standards are supported by the unit, allowing NTSC and PAL composite digital signals right up to component digital signals at 1080p 60Hz. +44 (0) 1933 650 700; sales@sonifex.co.uk
