SONIFEX: Sonifex debuted two products aimed at the TV market but for radio broadcasters at the IBC show the Reference Monitor range is new. The Reference Monitor is a rackmounted stereo pair of speakers — 1 rack unit high. Each member varies by number of ana-

log and/or digital inputs, four to 10. All units share dual speakers, onboard five-band parametric EQ, tricolor LED meters, aluminum and steel construction with foam insulation to dampen vibrations. Source, level, M+S and phase inversion controls can be found on the front panel.

For information from Sonifex, contact Marcus Brooke in England at telephone: +44-1933-650700; FAX: +44-1933-650726; e-mail: marcus@sonifex.co.uk; or visit <http://www.sonifex.co.uk/> on the World Wide Web.
