Streamers: Among new devices from Sonifex is the line of **Pro Audio Streamers.** They allow audio to be streamed around a building using IP audio and Cat-5 cabling infrastructure.

There are three professional audio IP streamers in the line, providing encoding and decoding in different formats.

The PS-SEND converts an audio input to an IP stream, the PS-PLAY reads an IP stream and outputs to balanced and unbalanced audio line levels and the PS-AMP reads an IP stream and outputs audio to stereo speakers.

Each unit also has an Ethernet Web server to allow configuration.
