RB-UL2 Dual Stereo Unbalanced To Balanced Converter

The RB-UL2 is a dual stereo unit for interfacing domestic or semi-professional unbalanced equipment to professional balanced line levels.

All connections are on the rear panel. Four RCA unbalanced inputs have an impedance of 10k and are routed to four balanced XLR-3 outputs with an output impedance of <50 .

The output gain can be individually adjusted for left and right channels by using pre-set potentiometers accessible through the rear panel, allowing you to feed both balanced and unbalanced equipment.

// Manufactured to the highest standards in our UK offices... the Redbox range of products are "fit and forget" because you can set them up, fit them in your installation and then forget about them - they won't trouble you. All the Redboxes are screw mountable as standard and are either rack-mounted or have the option to be rack-mounted. //
