Conflict Minerals Statement

Conflict minerals relate to the mining of tin, tantalum, tungsten and gold (referred to as 3TG), from a location described as the 'Conflict Region'. This is situated in the eastern Democratic Republic of Congo (DRC) and its surrounding countries. These minerals are often mined under human rights abuses and can be used to finance armed groups.

Sonifex is committed to promoting ethical business practices and sourcing materials from environmentally and socially responsible suppliers.

In the course of assembling printed circuit boards, Sonifex use components which may contain elements of precious metals we buy from other suppliers.

Sonifex expects all suppliers of components and bare boards to comply with the rules and regulations regarding 'Conflict Minerals'.

Yours Sincerely

A handwritten signature in blue ink, appearing to read 'M. Brooke'.
